## 💡 Research Statement

My research focuses on **reinforcement learning for LLMs**, **reasoning**, **LLM-based agents**, and the **safety** challenges associated with generative AI, with an emphasis on diversity, robustness, generalization, and self-evolving systems requiring minimal human intervention. Recently, I have become interested in the reasoning capabilities of large language models. I aim to advance the development of innovative, reliable, and autonomous AI systems capable of adapting to diverse and dynamic environments.
